Technical Skills

Languages: JavaScript, Python, C, C++, SQL, TypeScript, C#.
Tools: React.js, React-Native, Next.js, Node.js, REST APIs, jQuery, HTML5, CSS3, Express.js, AngularJs, Optimizely.
Technologies: Git, GitHub, Redux, Snowflake, Matplotlib, MongoDB, Firebase, AWS, Bootstrap, Chakra UI, Material UI, Dialog Flow CX, ES6+, CodeCommit, SEO, BigQuery, GCP, CI/CD, Cloud Computing, DynamoDB, MySQL, JSON Token, JWT.
AI tools: Cursor, ClaudeAI, OpenAI, Lovable, Hugging Face, Grok, Windsurf, GitHub Copilot.

Professional Experience

Rocket Companies	Los Angeles
Software Engineer	Jan 2025 - Present
- Collaborate with designers, product owners, and engineering team members to create seamless user experiences. - Drove architectural alignment and improved testability by leading design reviews across engineering and product teams, resulting in faster feature delivery. - Lead three concurrent projects, managing a team of six engineers to deliver scalable, high-impact solutions. - Perform SEO site verification to ensure compliance with best practices and search engine guidelines. - Reduced security vulnerabilities by 30% through implementing security best practices and automated scanning tools. - Implement SEO and scale a marketplace to generate more than \$100K in monthly revenue through organic search. - Partner with product owners to define experimentation strategies, leveraging Optimizely to execute, and analyse A/B tests.	
California State University	San Bernardino
Developer, Digital Transformation	Jan 2024 - May 2024
- Assessing chatbot-student interactions to ensure the accuracy and relevance of information delivery. - Implementing React.js, with a Google Firebase-based evaluation panel, reducing evaluation time by 30%.	
Blackstraw.ai	Remote
Software Engineering Intern	Jul 2023 - Sept 2023
- Improved forecasting accuracy by 15% by developing and deploying predictive analytics models. - Generated data visualisations using Matplotlib, resulting in a 25% increase in stakeholder comprehension of key insights.	
Great Software Laboratory	Pune, India
Software Engineer	Jul 2019 - Jul 2022
- Guided frontend development for 5 key projects, achieving a 30% increase in user engagement by implementing innovative features and improving user experience. - Crafted responsive web designs and integrated ads, resulting in a 50% increase in click-through rates. - Accomplished a 30% reduction in response time and optimised data processing efficiency. - Secured high-quality React.js front-ends through debugging & testing to late-stage changes & presented solutions. - Constructed interactive React.js apps from Zeplin designs. Collaborated with the team to deliver client-facing features.	
Software Developer Intern	Aug 2018 - Jul 2019
- Coordinated to enhance user interfaces, improving design consistency by 40% across multiple projects. - Aided in debugging and optimising code, resulting in a 15% improvement in application performance.	

Education

California State University, San Bernardino, USA	Aug 2022 - May 2024
Master of Science, Computer Science	GPA 3.68/4.0
Chitkara University, Himachal Pradesh, India	Aug 2015 - Jul 2019
Bachelor of Engineering, Computer Science	GPA 3.50/4.0

Projects

Microsoft Todo:	July 2025 - July 2025
Created a To-Do app clone on Lovable, using Supabase for backend services and database management. Github	
Web Chat App:	Jan 2024 - Feb 2024
Developed a real-time chat application using React.js, Firestore, and Node.js, featuring user authentication, real-time messaging, and responsive design. Github	
Cultural Awareness App:	Aug 2023 - Jan 2024
Cooperated on a cross-cultural awareness app aiming to increase user engagement by 50% and foster understanding. Anticipate reducing cultural misunderstandings by 40%. Github	
Learning Center:	Oct 2021- Jul 2022
Established a flexible template canvas builder, enhancing instructor efficiency by 40% and projected to increase course delivery effectiveness by 25% and student engagement by 20%, leading to a 35% increase in course completion rates.
